# OVERVIEW

HOF Furniture System Pvt. Ltd. is a Ahmedabad based furniture company established in 1986 with 15 people and turnover of Rs. 15 Lac. Today we have more than 300 people and turnover of Rs. 71 Crore. For last three decades HOF is a leading brand in premium oce seating system, Luxury sofas, modular furniture, institutional furniture and hospital furniture.

The company has 20 agship showrooms in India including Kathmandu (Nepal) and counting and 300 authorised dealers across India.

The state-of-the-art manufacturing plant is spread over 1,69,000 sq. ft. and built-up area of 3,50,000 sq. ft. under one roof. It has pneumatically operated tools for various manufacturing operations like automatic machines for sizing and shaping of the seats and cushions and metal tube bending machines for better precision. Japanese Octa cloth cutting machine for leather and upholstery and many more state-of-the-art technology to deliver international standard products. HOF has best-in-class in-house R&D Centre, design studio and testing lab with latest equipments and customer care centre.

- Partition made from 100% aluminum extruded profile sections with 80 x 32 mm sectional elevation.
- All surfaces are provided with protective, weatherproof and dustproof clip on seal sections.
- Entire system is free from screwing, nailing, adhesives, etc. and based on Allen-key fitting.
- Cables can be extended from floor or ceiling and drawn out of any point as entire system is designed with hollow raceways.
- Freedom of design with flexible vertical and horizontal members and showcase any designer elevation. Paneling options include 12mm thk. board, 5mm/8mm thk. toughened glass, writable boards, backpainted glass, glasswool, etc.
- Fully customizable according to your requirements that include more than 10 shades for aluminum powder coating, wooden powder coating, raw board selection, laminate selection, hardware and accessories.
- Add ons include: Style profile door, venetian blinds, window cutouts, AC mounting, hidden electrical paneling, etc.

**Laboratory &  
Clean Room  
Furniture**

## PRODUCT RANGE

### **Laboratory benches & tables**

- Wall benches
- Island benches
- Work benches
- Peninsular benches
- AVT (anti-vibration tables)
- Reagent racks
- Laboratory working tables
- Sink tables

### **Storage solutions**

- Open shelves storage racks
- Floor mounted storage cabinets
- Wall mounted (overhead) cabinets
- Full height storage cabinets
- Retain samples' storage cabinets
- Ventilated storage cabinets for chemicals
- Customized storage cabinets
- Bio-safety cabinets

### **Modular operation theaters and Clean rooms**

- G.I. powder coated walls and partition
- Stainless steel walls and partition
- HPL (High pressure laminate wall panels and partition
- Surgical scrub stations - Foot and IR operated
- Sluice hopper with sink
- Instrument storage cabinets
- Vinyl Flooring
- Ceiling suspended Laminar air Flow

### **Fume hoods**

- Walk-in fume hoods
- Bench top fume hoods
- Distillation fume hoods
- Compact fume hoods
- Auxillary fume hoods

### **Laminar airflow units**

- Vertical Laminar air flow
- Horizontal Laminar air Flow

## LABORATORY MODULAR SYSTEM

### Material Of Construction

Frame work: Frame work made up of 60mm x 30mm x 2mm thick rectangular tubes and welded together by MIG welding to assure long lasting life and weight bearing capacity as per SEFA 8M compliance.

- Horizontal members and frame are of CRCA confirming to IS code IS 513:1994
- The C-frame/ H-frame legs are supplied with heavy duty and adjustable feet with tolerance of -5mm to +20mm for correction of unevenness of flooring.
- Shutters, drawers: Produced from Galvanized Iron sheets with zero spangle with minimum thickness of 1.0mm to 1.6mm as per IS 277 standard.
- Doors and drawers are double wall construction with sound dampening material filled inside.
- Shelves are eight bend panel with 20mm height.
- Panels are produced using latest CNC turret punching & laser cutting machines and then bent using CNC bending machines to ensure correctness in dimensional accuracy with precision which further enhance overall aesthetic appearance of lab furniture.
- Back panels are removable to give access to service line for easy maintenance.
- Reagent rack: Made up complete modular design with 2 stage horizontal storage shelves made of CRCA MS with pure epoxy powder coating and having cutouts for electrical switches and sockets with two nos. 6 module plate.
- Sink units comes with metal shutters, sinks are of SS or laboratory grade PP material with three way faucets and ante siphon bottle trap.
- Handles: Mat polished Aluminum type flushed type handles in sizes from 4", 5", 6" or "C" shaped stainless steel 304 grade handles.
- Hinges: Auto-closing type or Knuckle-butt type stainless steel hinges to enhance corrosion resistance power and in compliance with SEFA 8M compliant.
- Telescopic channels for drawers: Double extension heavy duty Sliding ball channels enables full opening of drawers (as per SEFA 8M compliant test)

Various configurations available in Modules (Under storage cabinets)  
as per requirements of laboratories in standard length of 400/450/500/600/750/900mm by width of 500mm.

1. Three/Four/Five drawer modules
2. Shutter and drawer combination
3. Full shutter module with adjustable shelves (+ 70mm)

### Finish:

Frame works are 7 tank pre-treated & epoxy polyester powder coating with DFT range (40-60 micron). Panels, shutters, drawers etc. are epoxy polyester powder coated with DFT of 40-60 micron.

## C - FRAME LABORATORY MODULAR SYSTEM

C-Frame design for Laboratory that needs extra strength for equipment and at same time requires a modern cantilevered modern appearance.

**P-1 (C-Frame) Modular system** are specially designed to meet modern architecture which is extremely good in aesthetics.

Leg space, KBT (Key board tray) can be provided as per customers' requirements. Easily removable type end closure panels at rear portion of leg space for easy maintenance purpose.

C frame can be used with floor standing base cabinets ,mobile units and affixed with suspended cabinets.

## C - FRAME LABORATORY MODULAR SYSTEM

## PLINTH TYPE LABORATORY MODULES

**P-2 Modular system (Plinth mounted)** provides complete flexible modular solution in which, each module has its own base frame which also acts as a skirting.

Leg space, KBT (Key board tray) can be provided as per customers' requirements.

Easily removable type end closure panels at rear portion of leg space for easy maintenance purpose.

The work tops are supported on the plinth mounted under bench storage units provide a strong Construction.

## PEDESTAL TYPE LABORATORY MODULES

**P-3 (Pedestal)** mounted design is one of the common type of modular system used in most of laboratory applications.

Our specialized and robust construction does not require any supporting steelwork to mount worktops.

P-3 is particularly suitable for laboratories which need economical layout and where flexibility is not required.

Access to the service void is via the removable back panels of the cupboard units and knee spaces.

The system advantages include:

- Economical Design
- Robust Construction
- Worktops supported directly on cupboards
- Under-bench storage units designed to clients requirements

## H - FRAME &amp; CANTILEVER

**P-4 (H-Frame)** is designed for Laboratory that require heavy duty base structure for loading larger equipment.

The cabinets is movable according to space requirements of laboratories.

Also can be customized different cabinets inner structure for storage.

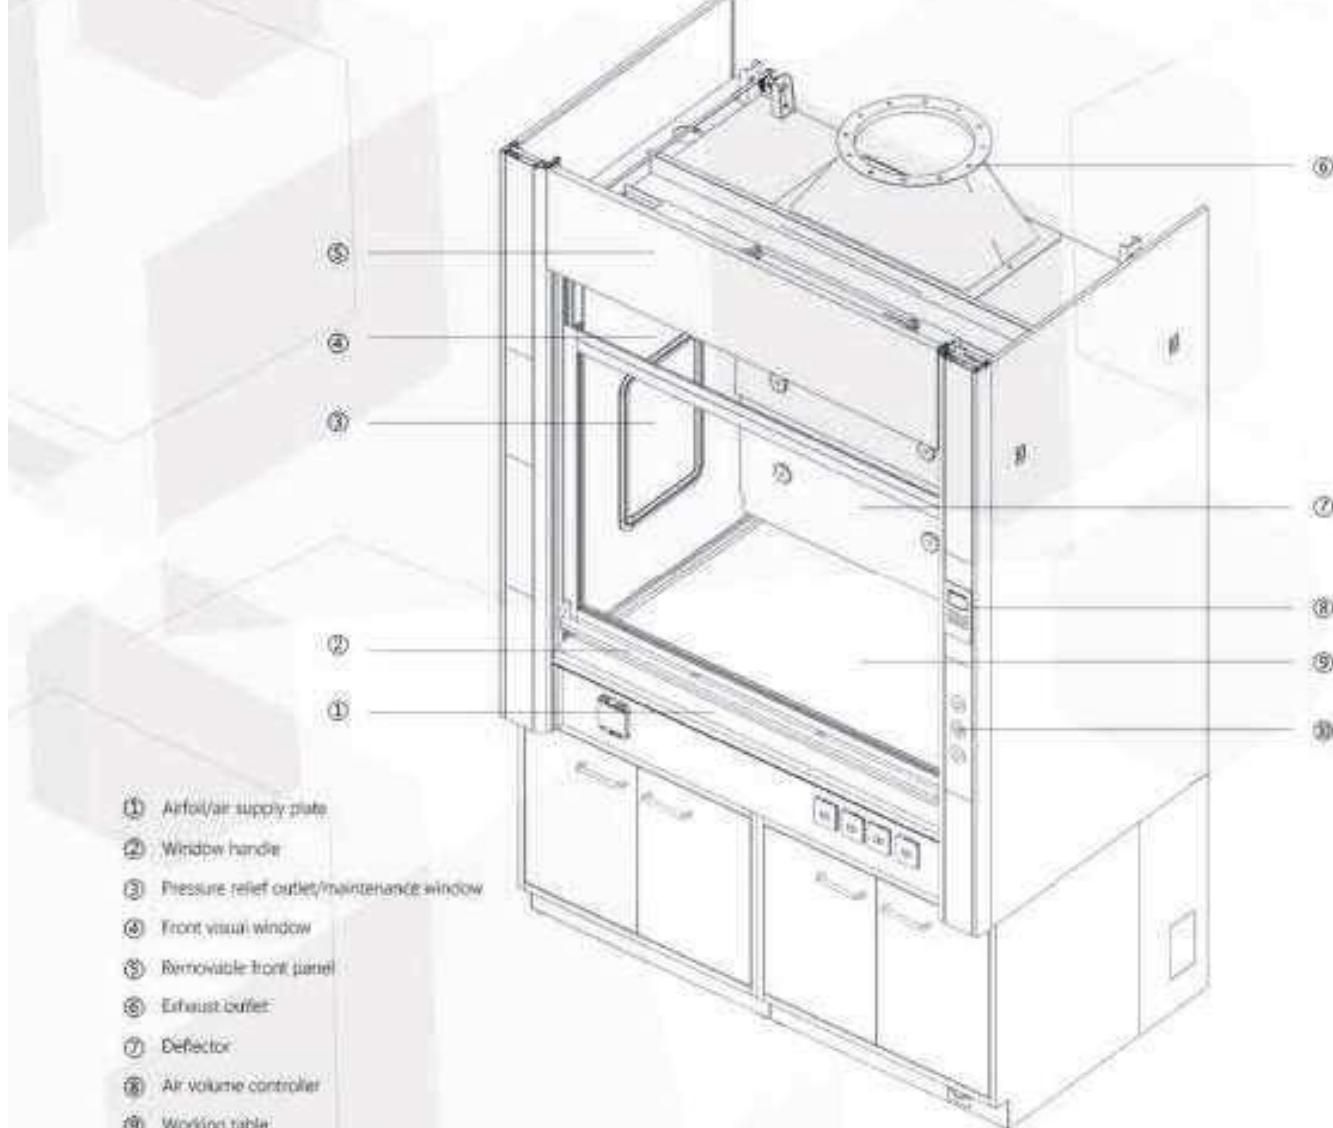

**Cantilever design** is one of the open type and versatile furniture system that is ideal for laboratory which requires flexibility and ideal for labs that need more floor space for equipment.

**P-5 system** offers rigid and heavy duty steel framing work on which worktops are mounted with independent under-bench units.

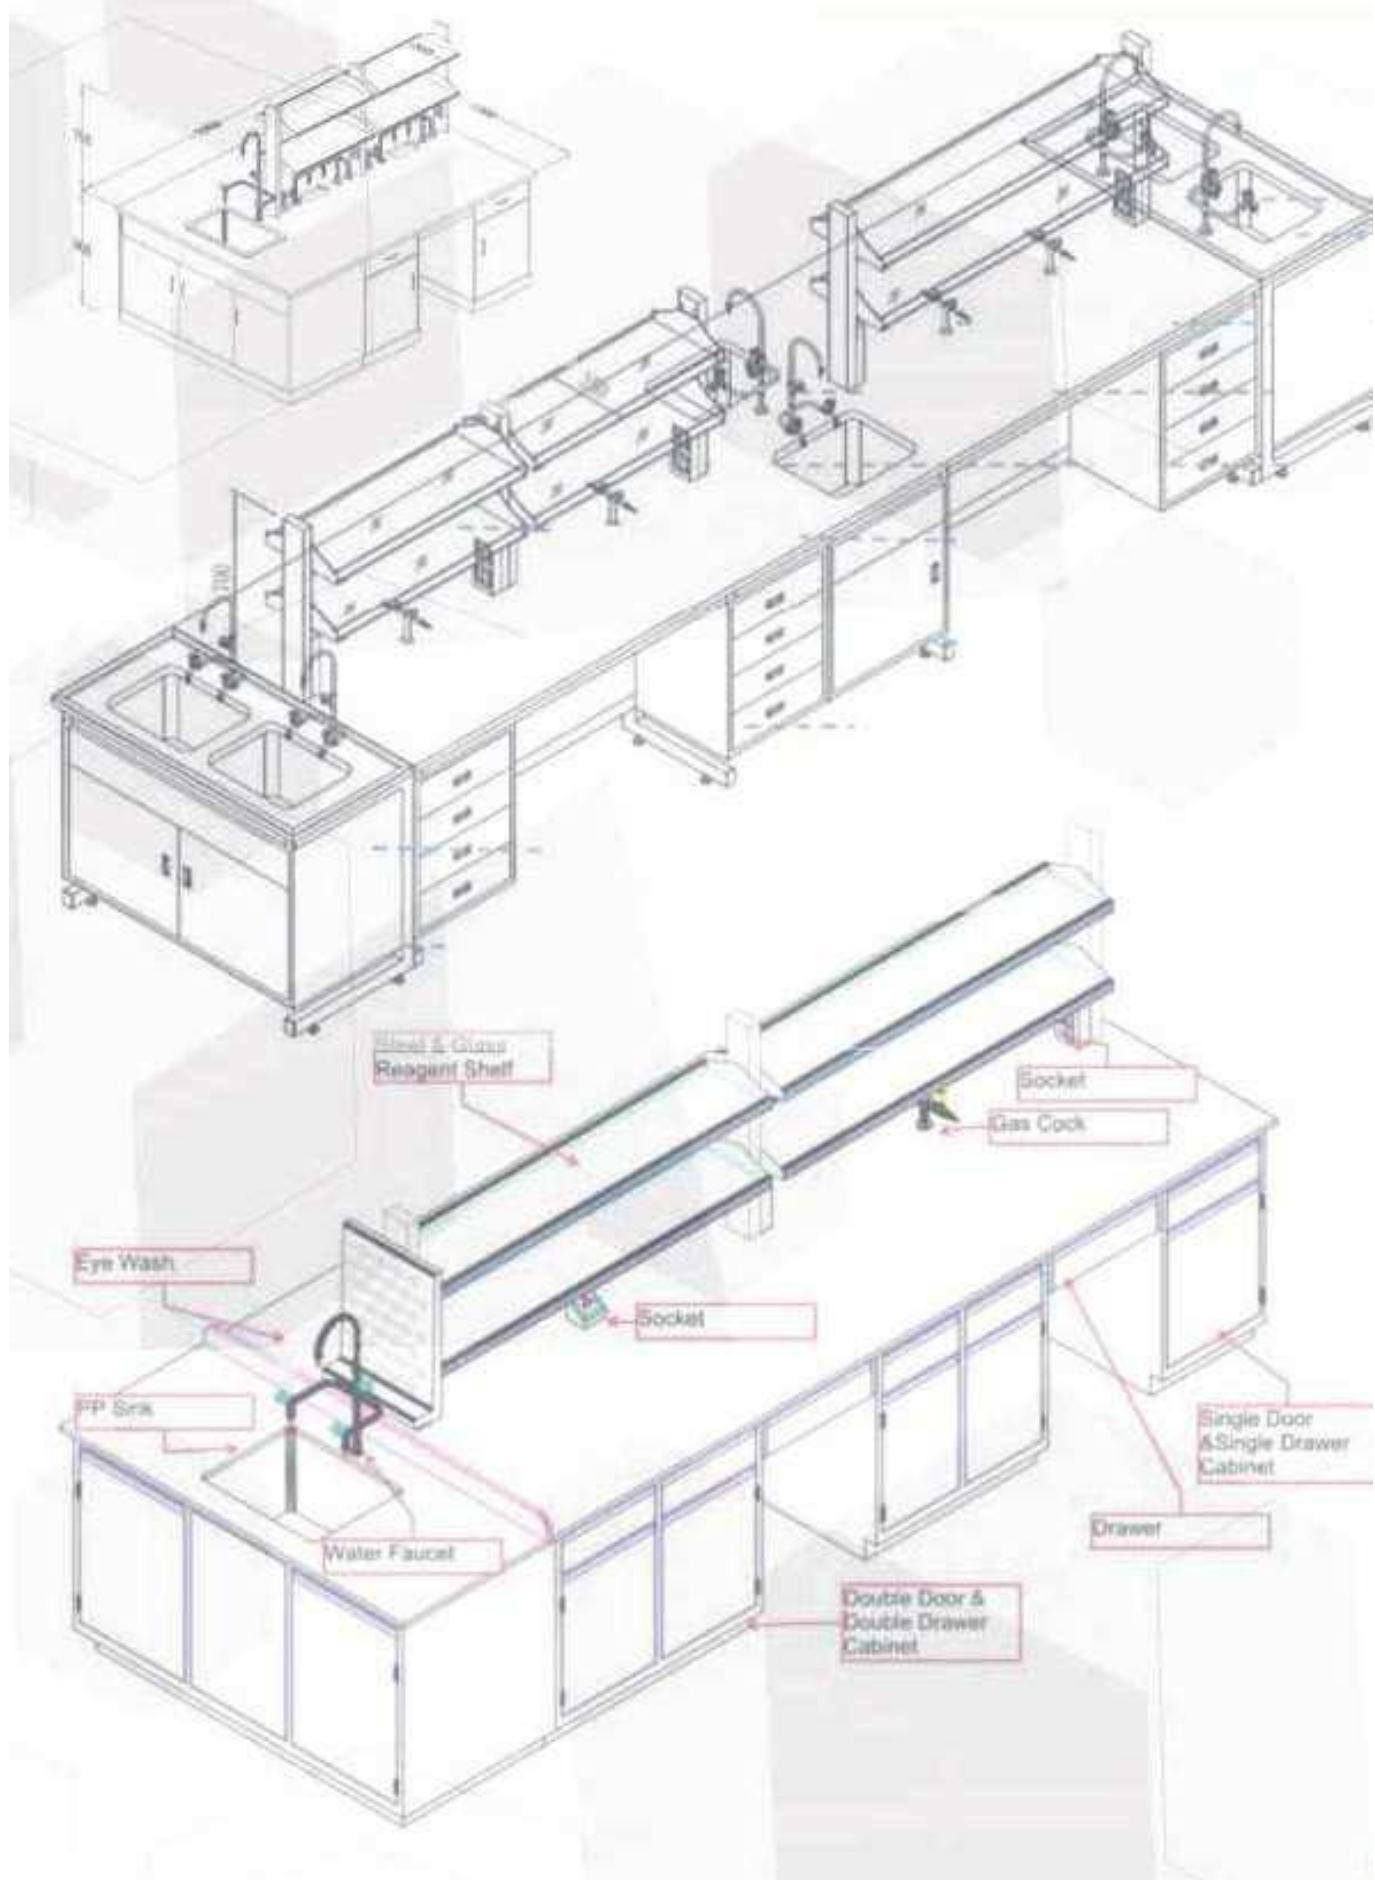

Movable and repositionable cupboards and drawer units offers advantage of re-adjustment of laboratory units at later stage.

Mobile units are mounted on heavy duty laboratory grade castor wheels for regular cleaning purpose.

## FUME HOOD

## LABORATORY MODULAR SYSTEM

## WORKTOPS

SN	Type of worktop	Size	Resistance against heat & Chemical	
1	Ceramic worktop	Length – Customized Width: 750mm / 1500mm Height / Thickness: 18mm / 20mm	Strong resistance against solvents and most of acids and at any temperature	
2	Phenolic resin	Length – Customized Width: 750mm / 1500mm Height / Thickness: 12.7mm with false edge	It is resistant for many kinds of acid,alkali,solvent and reagent etc	
3	Epoxy resin worktop with sink	Length – Customized Width: 750mm / 1500mm Height / Thickness: 16mm/20mm/25mm	It is resistant for many kinds of acid,alkali,solvent and reagent etc.	
4	Granite	Length – Customized Width: 750mm / 1500mm Height / Thickness: 16mm,19mm,25mm	Good chemical and stain resistance, good scratch resistance	
5	Melamine / Laminated ply	Length – Customized Width: 750mm / 1500mm Height / Thickness: 18mm / 25mm	Low chemical and heat resistance and mainly Used for non-chemical applications	
6	Sinks	Length – Customized Width: 750mm / 1500mm Height / Thickness: 18mm / 20mm	Strong resistance against solvents and most of acids and at any temperature
